  { "cardType": "food", "details": { "restaurantName": "", "mealType": "",
"priceRange": "", "description": "" } } ]
```

Error bubble

"Sorry, I couldn't put your Kyoto weekend together just now. Let's give it another go." **To fire it:** (1) open the page with `?fail=once` at the end of the address; (2) send "Plan a weekend in Kyoto for two"; (3) the thinking animation plays, then the error bubble (first request only); (4) tap **Try again**, bottom right in the bubble, and the three cards appear.
